JOGINDRA, with more than 40 years of experience, is one of the leading manufacturers of high quality Granulators. Our product range begins with the small Scrap Granulators and reaches the high performance Granulators, including special machines such as Single Shaft Shredder for heavy plastic lumps or the Pulverized Systems for fine grinding applications. Using drive motors ranging from 2.2 KW to 200 KW, JOGINDRA machines cover the complete spectrum of plastics size reduction applications.

The **JEG series** is based on the latest machines designed and perfected throughout the years. They can be implicated for almost all applications of plastics granulation. All machines in the **JEG** range produce a high quality granulate for injection moulded articles, spurs, pipes, profiles, sheets, film or start-up and head waste lump. The machines are economical, reliable, easy to clean and have a long service life.

JOGINDRA can also offer a wide range of necessary ancillaries such as Blowers, Suction Systems, Metal Detectors, Fines Separators, etc.
